[DOI: 10.1063/1.1774987]

The values of the normalized integrated intensities B_4^* given in the last column of Table IV were calculated using an incorrect normalization factor. The correct values are $B_4^* = 0.33, 0.37, 0.35, 0.32,$ and 0.38 at $T(^{\circ}\text{C}) = 22.8, 30.1, 40.0, 60.0,$ and $80.0,$ respectively. The Average \pm S.D. for the column is $B_4^* = 0.35 \pm 0.02$.
