

Tuesday Thursday 2:30pm to 3:45pm

Spring 2013: PHYS 108

Physics for a Better Environment

Taught by Professor George Rhee

Fulfill Science or Science with Lab Requirement

This is a survey course on the most pressing issue of our time: energy consumption and environmental sustainability based on sound science. This course fulfills either the science or science with lab (if taken with PHYS 108L) requirement. The math used in the course is minimal at the level of a typical survey course such as Astronomy 103 or Environmental Studies 101.
