

Physics 301: Mathematical Physics**NAME:****Quiz 1:** This is a fun quiz. There are no marks.

1. In physics jargon, the word “clearly” means:
a) clearly. b) unclearly. c) after 4 pages of algebra. d) wrongly. e) all of the above.
2. In physics jargon, the phrase “must be” means:
a) is. b) just accept it that. c) not necessarily so. d) can’t be. e) all of the above.
3. For developing and teaching this course, the instructor is interested in learning something about the students and is asking the students for help. Responses are **VOLUNTARY**. The instructor would appreciate it if the student taking this quiz provided some or any of the following information: name, year, major or possible major, and a sentence or so on why you took this course.

4. If you would like to have your grades posted online at the course website under anonymous alias, please provide an alias that only you can recognize—nothing objectionable. The alias can consist of letters (small or capitals), numbers, and the special symbols ,-.”%*@#.

Posting of grades is **VOLUNTARY**. It is very useful though. You can check your grades at any time. Note NAU permits posting of grades by anonymous alias with student permission (see http://home.nau.edu/enrollmentservices/FERPA_for_Faculty.asp). But NAU does **NOT** permit grade notification by email since confidentiality is not guaranteed. So if you don’t give permission for anonymous posting, you will have to call me or talk to me in person for your current grades.
